## Relationships stories — part 1

### **Best friends**

Li and Ari are in Year 7. They have been best friends since primary school.

### **Going out**

Jesse and Ashley from Year 8 have recently started going out together.

### **The team**

Rai's under 13s basketball team train twice a week on Wednesdays and Fridays after school. They are a really good team and recently won a tournament cup.

# Resource H

## Relationships stories — part 2

### **Best friends**

Li and Ari are now in different classes at secondary school and don't see each other as often. Ari has been spending more time with Frankie, and now wants to be 'best friends' with Frankie, not Li.

### **Going out**

Ashley does not want to go out with Jesse anymore.

### **The team**

Rai wants to leave the team to try another sport but doesn't want to let the team down.

## Concept conversation: how babies are made

A group of children, about your age, from a school not far from here, were having a conversation about how babies are made. This is what they said...

**Pupil A:** I thought that babies were delivered to their parents by a special bird—like the one you see printed on 'Congratulations on your new baby' cards.

**Pupil B:** I was told that babies are collected from the chip shop!

**Pupil C:** That's so silly! I know how babies are made. They start as a tiny seed, and when it is time they grow into a baby inside their mum's tummy—it takes years and years for a baby to grow.

**Do you agree with any of the pupils? How do you think babies are made?**

# Resource J

## How a baby is made sequencing cards

An adult couple who are in a relationship might kiss and cuddle, get very close, and touch each other in romantic and sexual ways. They should both feel happy and comfortable doing this together.

Sometimes when a male and female person are making love together, the penis grows hard, and the vagina may get slippery. The couple may decide they want to have sexual intercourse.

This means the man's penis slides into the vagina.

The penis squirts a sticky liquid called semen into the vagina.

Millions of tiny sperm in the liquid quickly swim up inside the uterus to the fallopian tubes.

If there is an egg (ovum) in one of the tubes, one of the sperm might meet it, stick on to it, and enter the egg. This means the egg is fertilised.

The fertilised egg travels down the tubes to the uterus or womb. It divides into lots of different cells and settles in the womb.

The cluster of eggs gradually grows inside the mother's uterus or womb and is called a foetus. It takes nine months until the baby is ready to be born.

# Resource K

## Pregnancy fact cards

A human baby is born after nine months in the mother's uterus (womb).

Women feel sick when they are pregnant.

Babies are born through their mother's vagina.

Twins are made when two sperm find two eggs.

Twins are made when two sperm find two eggs.

Only females can give birth to babies.

Sexual intercourse is the only way a baby can be made.

A couple can prevent a baby being made during sexual intercourse.

Not everyone has a baby.
